Towel Warmers

Ellipse

Romania - Purmo

- Eye-catching design
- Easy to clean
- Easy installation
- Variety of color options
- Intuitive control

Description

Ellipse, with its elliptical design, is a heating element that captures attention in any setting. Made of steel, it is available in both hydronic and electric versions, with a color range including glossy white, anthracite gray, and raven black. Easy to install and maintain, Ellipse offers intuitive control and a smooth surface that facilitates cleaning

Area of Application

Ellipse is ideal for bathroom environments, thanks to its elliptical design and steel construction. It supports a maximum operating temperature of 110°C and a maximum pressure of 6 bar. Available in hydronic and electric versions, with central 1/2" hydraulic connections.

Selection Criteria

For product selection, consider the available sizes (1390x390 mm and 1790x490 mm) and heating needs. Consult our design service for more details.

Basic User Instructions

Install Ellipse by attaching it to the wall with the provided brackets. Ensure that the hydraulic connections are properly connected. For the electric version, use the Schuko plug and the remote control to adjust the temperature. Regularly clean the smooth surface to maintain its aesthetics.

Prescription text specifiers

Ellipse is a hydronic and electric towel warmer, ideal for bathroom spaces. Made of steel, it offers a unique elliptical design and a smooth surface for easy cleaning. Available in various sizes and colors, it supports a maximum temperature of 110°C and a pressure of 6 bar.
