Accessories (fixing)

Noppjet Accessories

Romania - Purmo

- Seamless plate connection
- Secure pipe placement
- Supports complex layouts
- Reduces waste
- Enhanced heat transfer

Description

Noppjet Accessories include a range of components essential for the efficient and secure connection of diffuser plates and pipes within Noppjet floor heating systems. These include connectors for diffuser plates, diagonal pipe clips for securing pipes that run diagonally, and other specialized fittings for doorways and complex room geometries. These accessories ensure minimal waste, optimal heat distribution, and easy installation even in intricate layouts. Maximum allowable load and precise fit contribute to enhanced overall system performance.

Area of Application

Noppjet Accessories are suitable for use with Noppjet floor heating systems, particularly for connecting and securing diffuser plates and pipes. Ideal for complex room geometries, areas with heavy loading, and where there's a need to minimize waste by efficiently connecting plates. Maximum heat transfer and precise pipe positioning are ensured, even in diagonal layouts or around obstacles like doorways.

Selection Criteria

Select Noppjet Accessories based on system requirements and room geometry. For precise selection, use our design service or refer to our brochure for quick comparisons and compatibility.

Basic User Instructions

Ensure pipes are correctly aligned with the diffuser plates before securing with Noppjet Accessories. When installing pipes diagonally over long distances, use the diagonal pipe clips to keep them secure. Connect diffuser plates seamlessly to maintain system integrity and efficiency. During installation, ensure that all connections are tight and secure to prevent leaks and optimize performance.

Prescription text specifiers

Noppjet Accessories are essential for the optimal function of Noppjet floor heating systems. Designed for precision and efficiency, they include elements for connecting diffuser plates, specialized clips for diagonal pipe runs, and fittings suitable for areas with high load or complex geometries. Accessories such as the diagonal pipe holder, diffuser plate connectors, and transition elements for doorways ensure secure and seamless connections, minimizing material waste and enhancing system performance. Maximum load and heat conductivity are improved, making them ideal for professional, high-demand installations.

Purmo Group Poland Sp. z o.o. offers a full range of these accessories to match your specific project needs.
