Aquilo FMS

Romania - Purmo

- Încălzire eficientă
- Construcție robustă și durabilă
- Capacitate Mare
- Instalare flexibilă și adaptabilă pentru diverse nevoi de încălzire
- Compatibilitate estetică și adaptabilitate pentru diverse interioare

Descriere

Convectorii FMS sunt compuși dintr-un schimbător de

căldură din cupru și aluminiu vopsit în negru, montat într-o carcasă din tablă zincată și vopsită standard tot în culoarea neagră, optional se poate alege tablă din oțel inoxidabil. În partea superioară, convectorul este prevăzut cu o grilă transversală sau longitudinală, realizată din lemn sau

metal cu finisaj de fag sau stejar, băițuit sau lăcuit, oțel inoxidabil, duraluminu în diverse culori, natural, bronz

deschis, bronz închis sau negru. Racordarea convectorului la instalație se face prin două racorduri cu filet interior G ½".

Domeniul de aplicare

Convectoarele Aquilo FMS sunt ideale pentru aplicații de încălzire podea în diverse medii. Ele dispun de un schimbător de

căldură din cupru-aluminiu, instalat într-o cuvă din oțel galvanizat (vopsită negru). Cu presiuni operaționale de până la 10 bar și temperaturi maxime de 110°C, sunt potrivite pentru spații rezidențiale și comerciale.

Criterii de selecție

Criteriile de selecție a produsului includ dimensiuni (lățime, lungime, înălțime), material (cupru, aluminiu, oțel) și parametri operaționali precum presiunea și temperatura. Pentru o selecție rapidă, folosiți broșura sau serviciul nostru de design.

Instrucțiuni de bază pentru utilizator

Asigurați-vă că convectorul Aquilo FMS este instalat într-un spațiu de podea pregătit corespunzător. Conectați schimbătorul de căldură la sistemul de încălzire folosind filetele interne G ½" furnizate. Unitatea trebuie să fie fixată în siguranță și verificată pentru scurgeri. Inspectați regulat convectorul și asigurați-vă că grilele sunt curate și neobstrucționate pentru a menține performanța optimă.
