Premier Metric

Myson Premier Metric panel radiator has a unique round top.

Data sheet
2026-11-17

- Stylish design
- Extra safety
- Maximum flexibility
- High heat output
- Numerous sizes available (also imperial, see Premier HE)

Myson **Premier Metric** is renowned for its round top, providing extra safety while adding a unique style and aesthetic appeal. Available in 168 different sizes, it comes in single convector, double panel extra, and double convector types. Suitable for low-temperature systems and offers impressive heat output, making it perfect for any project. See also Premier HE for models in imperial sizes.

Area of application
The Premier Metric radiator is suitable for both domestic and commercial heating applications. These include traditional and modern room designs. With three types (single convector, double panel extra, double convector) and different height options (300mm to 700mm), it offers flexibility as well as impressive heat outputs with 4-tap connections and high safety standards.

Sizing
For selecting or calculating thermal heat power output, use our design service. For quick selection, use our brochure.

Usage
Ensure the radiator is installed by a professional. It is best for use on 2-pipe pumped indirect systems. With 4 x ½" BSP connections, it's suitable for maximum working temperatures of 100°C. This radiator has been tested to a pressure of 7 bar and can withstand a working pressure of 5.4 bar. All air vents and plug packs come included in the packaging.

AMA Text
The Premier Metric from Myson is designed for both domestic and commercial heating applications. Manufactured to the highest standards, it's available in 168 sizes and three types: single convector, double panel extra, and double convector. Nominal height options range from 300mm to 700mm, with lengths from 400mm to 3000mm. All sizes feature 4 x ½" BSP connections. The radiator includes a 10-year warranty from purchase, tested to BS EN 442 standards. Maximum operating pressure 5.4 bar, tested at 7 bar, and operating temperature up to 100°C. Integral air vent and plug packs are included. Employed under two-pipe pumped indirect systems, it offers superior heat output with additional safety due to its round top design.

Specifications

PROPERTIES	UNIT	VALUES
ETIM Class		EC011022
Material		Steel
Type		11, 21, 22
Surface structure		Profiled
Max working pressure	bar	5.4
Number of standard connections		4
Heat output according to recognized EN 442 laboratory		Yes
Max. Operating Temperature	°C	100
Standard color		Yes
Color		White
RAL number		9016
Grill/Cover plate		Yes
Grill/Cover plate		Yes
Gloss value		Glossy
Thread dimension (inch)		1/2 inch
Thread connection		Internal thread
With single-point connection		Yes
With air vent connection		Yes
With air valve/vent		Yes
With drain option		Yes
